7/10/10

Dear Judge Burton Lifland,

I was advised to not write to you in response to this current objection on behalf of deferring customers for S,PA since I was told it wouldn't make a difference. However, I woke this morning compelled to write to you anyway. The words I woke to were "The laws were made by the people for the people". This whole fiasco with the Madoff scandal, ponzi schemes + our economic situation is truly unfortunate and I don't envy the situation or job that you involved with. I do feel however that you are in a great position to take a stand and make a difference. Many of the investors are little people like myself that were advised to invest our monies safely, conservatively + wisely. We never made large gains or losses just a steady

over

4-8% return annually. Originally I am from Syracuse, New York where my grandfather was a doctor + taught at The University in The Medical School. He was a great influence on me + helped me to believe in ideals, what is right + to work hard + to believe in ~~thems~~ myself + others. I am writing to you in his honor, mother's + my daughters'. See the money that was invested was not only what I have saved since I began working at the age of 12 but the small savings he + my mother passed on to their grandchildren + great grandchildren. We are not talking about alot of money in the scheme of things but what this money represented. It represented all of our hard work, our sacrifices to ^{put} aside to create opportunities for future education for our children, our families + our communities. I am asking you please

... contd. ... Consider carefully The description of "customer" for S.P.A./S.P.E. Many of us "customers" were The pennies, The nickels + The dimes That were saved up over time to tally up to an account That was invested w/ Madoff. I truly believe "we" are The customers, we are The people whose years of labor were put into a nest egg + advised it was a safe + insured investment. I understand you have a responsibility to uphold The law + This I truly respect but if I could ask one thing of you as you review The facts could you please keep in mind That we are The people, The hard working, The honest and The willing...

→ over

Thank you very much your honor -

Sincerely -

Cade S. Norton
